

Electric vehicles  
have arrived.

Are you  
ready  
to drive?

## TYPES OF EVS

1. **All Electric Vehicle (AEV)**  
also known as Battery Electric Vehicle (BEV):  
Powered solely by an electric battery
2. **Plug-in Hybrid Electric Vehicle (PHEV):**  
Powered by an electric battery, and supplemented by conventional fuels (like gas or diesel)

## IF ALL VERMONT CARS WERE ELECTRIC,

we would save over  
**\$800 million**  
in gasoline costs  
**EVERY YEAR.**

Drive Electric Vermont is a project of the Vermont Energy Investment Corporation (VEIC) in partnership with the State of Vermont, and a broad array of stakeholders advancing electric vehicle technology.

## Over half of Vermont communities have plug-in Electric Vehicles (EVs) registered—find out why below!

### Save Money

- Spend the equivalent of about \$1.50 per gallon of gas to charge your vehicle.
- Save \$1,200 or more on maintenance costs.
- Receive up to \$7,500 in federal tax credits toward your purchase.
- ...Or get a great lease deal through several Vermont dealers.

### Increased Convenience

- Just plug in at night and wake up to a full charge each morning (no more trips to the gas pump!)
- To refuel away from home, visit one of Vermont's many public charging stations. See the map of public charging stations on our website.
- Indulge in luxuries such as smartphone vehicle management apps, preheating and cooling systems, heated seats and even solar panels.

### Great Performance

- Accelerate faster than you would in most equivalent gas-powered cars.
- Expect increased traction due to heavy batteries (great for winter driving conditions).

### Great for Vermont

- EVs increase our energy independence and can be powered with renewable energy.
- Breathe deep. EVs produce zero tailpipe emissions and have significantly less overall impact than gasoline vehicles (even factoring in emissions from manufacturing and electricity generation).
- Reduce noise pollution (EVs are incredibly quiet).

Not shown: BMW i8 PHEV; BMW 740e PHEV; Mercedes-Benz GLE550e PHEV; Volvo S90 PHEV

†Electric range is from official manufacturer ratings for current new vehicles. Range is generally 20-50% less in coldest winter conditions and can be lower in older model years.

as of 11/29/2018

++No Vermont dealerships, but vehicles are available to Vermonters in nearby states or online. +++Coming in 2-6 months.
